Home Learning

There are three different activities based on a text we will be reading which you can choose between for your home learning project. It is up to you to choose **one** activity. This home learning project is optional.

Activity 1

We will be looking at the importance of, reducing, recycling and reusing. Think of a creative way to promote this.
Here are some ideas to help you:

- Produce a poster or leaflet.
- Make a model/ sculpture.
- Write a poem, song or rap.
- Write a television broadcast!
- Design or produce an item of clothing with a snappy logo, e.g. T-shirt, badge, banner, hat etc.
- Poster of a courageous advocate who helps the environment.

Activity 2

Take a piece (or pieces) of household 'junk' and find as many creative ways of reusing it as you can. Make sure you produce a piece of A4 paper illustrating the ideas you came up with.

Your optional Home Learning Project is due in on Tuesday 3rd November.

Good luck!

Activity 3

How do you reduce, reuse and recycle in your own home? Produce a diary/ scrap book or annotated photographs demonstrating how you reduce, reuse and recycle in your own home.
