

Year 6 Summer Home Learning Project

Global Explorers

Choose a country you are interested in and create a project all about it. You will need to include information about the continent it is in, the capital city, main rivers, land types, the flag and national dress, places of interest, main imports and exports, weather and climate, currency and anything else that would teach us more about the country you have chosen.

Create your own information pack. You should include a contents page and a glossary. You may use a computer but take care not to just print out information straight from web sites. Put the information in to your own words.

Please bring your project in during the week beginning 6th June.
